

4-Effective Ways XFLASH Systems helps advanced airlines monitor; safety, efficiency & comply in today's regulatory environment...

XFLASH Systems has delivered a low-cost ACARS-based alerting system to help airline Operations staff monitor flight events & communications, minute-by-minute. This proven system is in daily use by major carriers, including Emirates Airline.

X FLASH

Helps busy airline operations staff monitor for urgent safety, security or efficiency-related messages from crew. Automatically monitors Company ACARS messages from airborne crew, 24-hours a day / 7-days a week. Provides rapid visual alert to Ops staff, when important message received, allowing rapid reaction.

D FLASH

Provides automatic visual alert when a Company aircraft diverts from the original destination. Allows Ops staff to alert the new arrival airport and original destination, in timely manner.

G FLASH

Provides automatic visual alert to Ops staff when a high-level routine message (for example, slot time request) is sent by crew.

ATC FLASH

Allows ATC anywhere in the world, send ACARS text message to Company aircraft not responding. Simple phone call by controller to our system advises subject crew of ATC frequency they should be on. Company copied on message so also know right away of issue. Helps avoid potential embarrassing military intercepts, bad PR, diplomatic incidents, violations & more (system in advanced development).

Actual, Live Examples

Here are just a few of the many examples we have where XFLASH systems have proven beneficial in actual daily operations;

XFLASH
2 PAX 25A/B. REPORT
SUSPICIOUS BEHAVIOUR
HAVE MOVED SEATS
TWICE...

DFLASH
AIRCRAFT A6- DIVERTING
TO OPKC ETA 2037 FOB
16.8 REASON CODE 2

XFLASH
1400 KG FUEL REM
IN CTR TANK. WINGS NOT
FULL. FUEL OUTSIDE
LIMITS. ANY IDEA?

XFLASH SATCOM
VOICE FAIL
POSITION TASMI.
PLEASE REPORT IF
BGW IS SUITABL

XFLASH
UNABLE TO RAISE
MEDLNK... CAN YOU
ORGNSE A PATCH
4 US DUE UNWELL
